Randy,

Touching base with Allison, I have learned there are limits on New Hampshire's point-of-sale inspection requirement -- it is just for waterfront properties within 200 feet of tidal waters. Here's the link:

<http://www.gencourt.state.nh.us/rsa/html/l/485-a/485-a-mrg.htm>

Scroll down to section 485-A:39 Waterfront Property Sale; Site Assessment Study.

It sounds like you are already familiar with what Massachusetts has, but here's a couple of links to more information on that program:

<http://www.mass.gov/dep/water/wastewater/buysell.htm>

<http://www.mass.gov/dep/water/wastewater/inspects.htm>

Our information on the Maryland program is sketchy right now. I did find information on a 1998 law stipulating that point-of-sale inspections must be by trained inspectors and must go beyond visual inspections. As far as I can tell from the official record, Maryland did not rely on point-of-sale inspection requirements for approval of this condition under CZARA.

Also, a few counties within state coastal nonpoint management areas have point-of-sale inspection requirements for onsite systems, but I do not know how much of a factor CZARA was in these requirements.

Randy--

According to my records, MA, NH and MD relied on pt. of sale inspections to meet CZARA requirements. However, I'm not sure if these were developed specifically for CZARA or were already on the books that the states pointed to when developing their CZARA programs. Other states had voluntary programs (like ME) or had requirements for more frequent inspections (3-5 years).

Hope this is helpful.  
 Allison

 Jayne & Randy,

I think Oregon may be the first one; perhaps Allison can verify. I know Iowa has one, but obviously not as a result of CZARA.

Other states have expressed an interest in this approach.

Hi Don and Allison,

See Randy's request below. Are either of you able to answer his question? If so, please go ahead and send your responses

directly to him with a cc to me.

Thanks!

Jayne

 Subject: Time of transfer Question

Hello Jayne,

We are getting some interest in our time of transfer septic inspection rulemaking. Last Friday, we were invited to testify on the rulemaking to the House Committee on Energy, Environment & Water (the link is an audio file that has the Onsite topic starting approximately at 1:24:00 and is about 45 minutes long). One of the questions were asked that we need to answer is what other states have a Time of transfer program as a result of CZARA federal requirement. Maine has a voluntary inspection program that 'provides assurance to the federal government that the state of Maine has adequate administrative controls relative to subsurface systems'. Since this is a CZARA requirement that existing septic system inspection programs are required to be in place, our legislators want to know what other states have this in due to federal requirements (hopefully not being too redundant). Massachusetts has a Title 5 inspection program that came on in the 90's when I still lived there.

I'm hoping someone in EPA has ready access in their brain to this information request and you maybe know who that someone is. It's worth a shot.
